

Post-Cataract assessment:

An appointment is usually undertaken 4-6 weeks after cataract surgery. The clinician is required to perform a refraction and ocular health check to both eyes.

The following information needs to be collected from the appointment:

1. Date of cataract surgery
2. Supervising consultant
3. Operating Doctor
4. Which eye(s)
5. Complications of surgery (noted pre-operatively)
6. Pre-existing ocular conditions (e.g., AMD, Glaucoma, DR, ERM etc.)
7. Outcome of the appointment
 - a. Discharge
 - b. Review at Surgical centre
 - c. Review by Optom
 - d. List for second eye
 - e. Other
8. Patient satisfaction score (1-5 with 1 being poor and 5 being great)
9. Details of any other reasons for prompt triage at the county hospital or post-operative concerns/complications

Provider	Post-Op submission platform
Herefordshire County Hospital (VEU)	Pharmaoutcomes
Border Health Alliance (BHA)	Pharmaoutcomes
New Medica Worcester	OPERA
Spa Medica Worcester	OPERA
Spa Medica Hereford	OPERA
Spa Medica Gloucester	OPERA

NB: If the patient attends a post-operative appointment and has complications which can be managed by the optometrist, the appointment may be altered to MECS/CUES to allow for prescribing (e.g., in the case of post-operative CMO). If the complication is more serious (e.g., retinal detachment) then a same-day referral to Eye Casualty should be made.
